

# OVERFILL PREVENTION – “ULTIMA RATIO” SYSTEM TO PROTECT YOUR VALUABLE LIQUID ASSETS

Eliminate the risks of OVERFILL and DRY-RUNS

## ABOUT FAFNIR

Level sensors and systems, expertly engineered

FAFNIR are specialists in the development and manufacturing of high precision sensors and systems for monitoring and measuring fill levels in industrial environments

Quality German Engineering

Unparalleled reliability in all environments

Highest safety standards

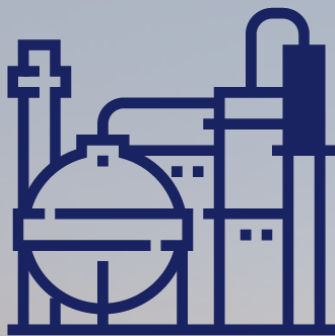

Field tested under the harshest conditions

**OVERFILL PREVENTION** systems (LS300 & LS 500 and 76 & NB 220) are the ideal solutions for tank overfill prevention/dry run monitoring and detection of interstitial leakages. For water polluting liquids, these overfill prevention device are an essential component for environmental protection.

## OVERFILL PREVENTION - FEATURES

# OVERFILL PREVENTION

### High customization level

Wide variability of available sizes, materials and applications

### Easy to install and completely maintenance-free

Easy installation and constant self-testing mechanism to ensure the system works 24/7

### Complete risk reduction

Standalone system with high reliability

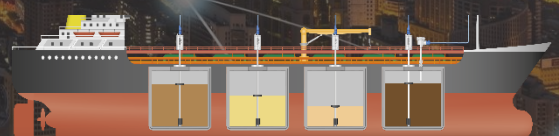

### Certified solutions

ATEX, IECEx, SIL 2 versions available

## Overfill prevention is available for:

- ✓ Tank storage
- ✓ Mobile containers
- ✓ Tank filling and more...
