

TORRIX XTS

The ALL-ROUNDER for level measurements

ABOUT FAFNIR

Level sensors and systems, expertly engineered

FAFNIR are specialists in the development and manufacturing of high precision sensors and systems for monitoring and measuring fill levels in industrial environments

Quality German Engineering

Unparalleled reliability in all environments

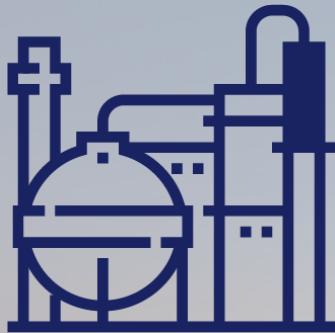

Highest safety standards

Field tested under the harshest conditions

TORRIX XTS is the most advanced probe in the TORRIX family and offers in addition to pure level measurement of the product and interface layer, it also measures simultaneously the temperature and density of the liquid. The integrated LCD display can show up to 3 measurement values at a time along with pictorial representation of the filling level continuously.

TORRIX XTS - FEATURES

PROCESS AUTOMATION

All-in-one probe: 4 in 1 measurement

Product level, interface, temperature and density

Integrated LCD Display

On-spot data interpretation for quick decision making

Combined Protocol Interface

4-20 mA / HART ® and RS-485 with Modbus or FAFNIR UD protocol

Robust design and fully maintenance-free

Temperature: up to +450° C, Pressure: -1 to +120 bar
No recalibration necessary and zero maintenance sensor

TORRIX-XTS is available for:

- ✓ Tank Storage
- ✓ Interphase
- ✓ Bypass and more...
